

Declare Your Energy Independence.

cleanenergychoice.org

Most of America's electrical energy comes from fossil fuels, like oil. But you can help change that. It only costs about 35 cents more a day to support the development of locally produced clean energy from wind, water, solar and biomass. Take control at www.CleanEnergyChoice.org, by filling out this coupon or the GreenUpSM card sent with your National Grid electric bill. Clean energy. It's real. It's here. It's working.

YES, I CHOOSE CLEAN ENERGY!
